PROFILE

IT student completing a BTEC Level 3 Extended Diploma in Information Technology with a confirmed DDM grade, combining hands-on IT support experience with a growing cybersecurity skillset. Holds CCNA (October 2026) and is currently preparing for CompTIA Security+ (booked 26 November 2026) and the ISC2 Certified in Cybersecurity exam (booked 24 November 2026). Comfortable troubleshooting systems and supporting end users, alongside building and documenting home lab projects covering SIEM, malware analysis, intrusion detection, networking and IoT alerting. Seeking a Level 6 Cyber Security Technical Professional degree apprenticeship or an entry-level role spanning IT Support, Service Desk, Infrastructure, Network Engineering, Cloud, IT Technician, SOC Analyst, Cybersecurity Analyst, Cyber Security Technologist, Security Operations and Blue Team work.

EDUCATION

BTEC Level 3 Extended Diploma in Information Technology | Hull College *2024 – 2026*

- Final grade: DDM (confirmed)
- Unit 9 (IoT Project Management): designed and built a Raspberry Pi Pico W intruder detection system with real-time Telegram and ntfy.sh alerting, delivered against a full project Gantt chart
- Unit 12 Assignment B: IT support portfolio drawn from the Hull College IT Services work placement
- Cybersecurity unit: Pass (P)
- Unit 19: IoT system design and build
- GCSE-equivalent English and Maths (grade 4+) held via WAEC, UK ENIC-verified

CERTIFICATIONS

- CCNA: held (issued October 2026)
- Cisco Introduction to Cybersecurity: held (issued April 2026)
- CompTIA Security+: exam scheduled 26 November 2026
- ISC2 Certified in Cybersecurity (CC): exam scheduled 24 November 2026

WORK EXPERIENCE

IT Support Placement | Hull College IT Services *2025 – 2026*

- Provided day to day IT support across college systems, building a documented support portfolio as part of BTEC coursework
- Logged 105+ hours of combined work experience across this placement, the Deloitte Cyber Job Simulation (Forage) and a Springpod cybersecurity sprint

QA Personnel | Birdeye *Seasonal, Summer*

- Carried out quality assurance checks on the peas production line, ensuring products met quality and safety standards
- Logged findings into the company's internal system for tracking and reporting
- Applied methodical, detail-focused inspection processes that carry directly into technical troubleshooting and testing work

Tin Wash Operative | BBF (Bakery) *Current, Part-time*

- Responsible for tin washing as part of the production process, maintaining hygiene and quality standards
- Balances this role alongside full-time study and cybersecurity portfolio work

INDEPENDENT PROJECTS & HOME LAB

Builds and documents home lab and infrastructure projects spanning networking, monitoring, IoT and malware analysis:

- Designed and built a Raspberry Pi Pico W IoT intruder detection system with real-time Telegram and ntfy.sh alerting
- Built and configured a Splunk and Snort home lab functioning as a SIEM, used for network monitoring, log analysis and tracking malware behaviour
- Set up and documented a REMnux and FLARE VM malware analysis environment, including a written technical blog post and GitHub README

- Ran hands-on lab sessions including a vsftpd backdoor exploit, MD5 hash cracking, MemLabs memory forensics, and Aircrack-ng wireless capture and analysis
- Published technical writeups on Dridex C2 traffic analysis, Snort IDS and others on Medium

SKILLS

- IT support and technical troubleshooting across desktop, network and infrastructure systems
- Networking fundamentals (CCNA)
- SIEM configuration and log analysis (Splunk)
- Intrusion detection and network monitoring (Snort)
- Malware analysis tooling (REMnux, FLARE VM, Volatility)
- Password auditing and wireless security testing (Hashcat, Aircrack-ng)
- IoT and embedded systems setup (Raspberry Pi Pico W)
- Customer-facing support, technical documentation and content production
- Methodical, detail-focused quality and process work
